

## IO7 – MOOC for Teachers

### Self-directed Learning Resource 2

<b>Topic:</b>	Introduction to Information and Data Literacy
<b>Title:</b>	5 Essential Media Literacy Questions for Kids
<b>Time:</b>	It will take you 2 minutes to watch this video. You can use the digital aids available to design a short 30-minute activity around the content of this video to deliver in class with your students.
<b>Type of Resource:</b>	Video
<b>Content of the Resource</b>	All media comes with an author and an agenda. Whether in the classroom or at home, help kids think critically about any media they view with critical questions that dig below the surface. Use these five essential questions as a springboard, and help kids dig deeper with even more critical questions of their own. And to really empower kids, have them create their own media with these same questions in mind.
