IO7 – MOOC for Teachers

Self-directed Learning Resource 3

Topic:	Browsing, searching and filtering data, information and digital content
Title:	6 Tips for An Ultimately Better Web Surfing Experience
Time:	It will take you 20-25 minutes to review this blog post, and to take note of what is important to you.
Type of Resource:	Blog Post
Content of the Resource	Even in this age of technological advancement, surfing the web can be a painful experience. You would think that with faster computers and connections, surfing the internet would be a breeze. Sadly, as speeds have gone up, so have the sizes of web pages and their computational demands. Back in the early 2000s, web pages were often less than 100 KB in size and required little in terms of computational power. But today, they are easily ten times that size — weighted down with fancy JavaScript functions, complicated formatting, and most of all, high bandwidth advertising. But there is a lot that you can do to improve your web surfing experience. This short blog post gives practical advice on how you can maximise your online searches by following some simple steps.
