IO7 – MOOC for Teachers

Self-directed Learning Resource 10

Topic:	Digital Content Creation
Title:	Program for audio recording
Time:	It will take you about 30 minutes to understand how the program works
Type of Resource:	Computer program
Content of the Resource	Audio recording, a useful practice of recording live voices of children or teachers, can be easily done with a smartphone or a PC/computer, using the tools that these technologies offer. It is possible to do it with no tools or, to improve the recording and if the technology in use allows it, through a microphone. A few programs exist in order to record and edit audios. One of these programs is Audacity, that can be downloaded on a computer.
