IO7 – MOOC for Teachers

Self-directed Learning Resource 4

Topic:	Digital Content Creation
Title:	Scratch
Time:	It will take you about 2/ 2 and a half hours to explore these websites and understand how they work
Type of Resource:	Website
Content of the Resource	Scratch and Scratch jr. (for children aged 5 to 7) are programming platforms developed by the MIT that allow to create and program interactive stories, videogames and other animation, using block-based programming. This technique allows to program without using a code, but just by manipulating objects and moving elements on the screen of the PC or tablet (visual programming).
